

Postdoctoral candidates for upcoming FCT fellowships

The *Bioinorganic Chemistry and Peptide Design* laboratory at the *Instituto de Tecnologia Química e Biológica* (Oeiras, Portugal) is looking for enthusiastic, qualified, and self-motivated postdoctoral researchers.

Projects: We are currently working in the development of different metallopeptides/peptidomimetics for:

- the removal of superoxide radicals, toxic species known to be involved in oxidative stress
- the catalysis of different oxidation/reduction reactions (achieving greener chemistry)
- the targeted molecular imaging of tumor angiogenesis (in collaboration with Medical Faculty, RWTH-Aachen University, Germany)

Requisites: good knowledge of English (written and spoken); PhD in Chemistry, Biochemistry, Pharmacy or related areas; competitive CV (good marks and publications).

Application: If you are interested on working in any of these areas and want to join an international and multidisciplinary team, please send by email a detailed CV, motivation letter, and preferably two to three recommendation letters.

Deadline for expression of interest: July 30th

(application deadline for FCT fellowship grants 6th September
