

NUTRITION IN PHYSICAL ACTIVITY AND SPORT

SUBJECT GUIDE

Academic year 2019-2020

(Fecha última actualización: 22/05/2019)

(Fecha de aprobación en Consejo de Departamento: 05/06/2019)

MODULE	CONTENT	YEAR	TERM	CREDITS	TYPE
PHYSICAL ACTIVITY AND HEALTH	<i>Nutrition in physical activity and sport</i>	3º	1º	6	Optional
LECTURER(S)			Postal address, telephone nº, e-mail address		
Eduardo Jesús Guerra Hernández			Nutrition and Food Department, 3rd floor, Faculty of Pharmacy. Office No. 316. E-mail: ejguerra@ugr.es		
DEGREE WITHIN WHICH THE SUBJECT IS TAUGHT					
Physical Activity Sciences and Sports					
PREREQUISITES and/or RECOMMENDATIONS (if necessary)					
Have studied the subjects of Human Physiology and Biochemistry of Exercise					
BRIEF ACCOUNT OF THE SUBJECT PROGRAMME (ACCORDING TO THE DEGREE ¿??)					
<ul style="list-style-type: none">• Study of energy and nutrient requirements and recommended intakes for optimal health• Study of specific nutrient requirements for athletes and study of proper food to cover• Diets of training, competition and recovery• Study of the most common nutritional disorders in athletes• Assessment of nutritional status					
GENERAL AND PARTICULAR ABILITIES					
<ul style="list-style-type: none">• CGI1; CGI2; CGI3; CGI5; CGI7; CGI8; CGP1; CGP3; CGP5; CGS1; CGS2; CGS3; CGS4; CPC5 (from the nutritional point of view); CPC6 (diets for training programs and sports)• Evaluate the nutritional quality of the diet (N1)• Assess nutritional status based on anthropometric, biochemical and dietary (N2)• Choose the most appropriate food based on its composition to make adequate and balanced diets for athletes based on individual characteristics and type of physical activity performed (N3)• Give nutritional advice to have an optimal health and a high performance sports (N4)					
OBJECTIVES (EXPRESSED IN TERMS OF EXPECTED RESULTS OF THE TEACHING PROGRAMME)

- Understand and convey the basic principles of human nutrition with particular attention to the incorporation of nutrients that promote healthy lifestyles and optimal performance in sports
- Use and interpret tables of food composition and recommended intakes of energy and nutrients for healthy diets and design appropriate to different periods of sports activity (training, competition and recovery).

DETAILED SUBJECT SYLLABUS

THEORETICAL CONTENT:

MODULE I: INTRODUCTION

ITEM I. - Definition of nutrition, food, nutrition and dietetics. Food, nutrient, diet and nutritional intake. A brief history of the Nutrition and Food Science. Classification and food constituents.

MODULE II: ENERGETIC AND NUTRITIONAL REQUIREMENTS

ITEM II. - Energy requirements of the human organism. Components of energy metabolism: basal metabolism, thermogenesis induced by food and physical activity energy expenditure. Methodology for determining the energy expenditure.

ITEM III. - Nutritional requirements and recommended intakes. Nutritional goals. Energy value of nutrients. Database tables and food composition. Dietary Guidelines.

MODULE III: FOOD, NUTRITION AND METABOLISM

ITEM IV. - Carbohydrates. Classification. Food Sources of Carbohydrates. Digestion of carbohydrates. Glycemic index and its use in the practice of sports. Nutritional requirements and recommendations. Use and needs of carbohydrates before, during and after the competition ...

ITEM V. - LIPIDS. Composition and classification. Food sources of lipids: fats of vegetable origin, animal fats. Digestion and lipid metabolism. Nutritional requirements and recommendations. Lipid utilization and needs of athletes. Relationship between fat consumption and health

ITEM VI. - PROTEIN. Composition and classification. Food Sources of protides. Digestion and protein metabolism. Evaluation of protein quality. Nutritional requirements and recommendations. Utilization and protein needs of athletes. Relationship between protein intake and health.

ITEM VII. - VITAMINS. Rating: water soluble vitamins and fat soluble. Food sources of vitamins. Vitamins and biological analeptic sports. Requirements and recommendations of vitamins. Use and vitamin requirements in athletes. Deficit, excess, and health.

ITEM VIII. - MINERALS. Rating: macro and micro. Food sources of minerals. Requirements and recommendations of vitamins minerals requirements in certain groups of athletes. . Deficit, excess, and health.

ITEM IX. - WATER BALANCE. Assessment of need regular water. Role of water in thermoregulation. Dehydration. Classification and composition of the beverages. Fluid administration in athletes. Factors influencing fluid replacement.

MODULE IV: NUTRITION AND DIET IN TRAINING, COMPETITION AND RECOVERY PERIOD

ITEM X. - DIETARY ALLOWANCES FOR THE PERIOD OF TRAINING. Establishment of single system. Serving training: theoretical bases and practical examples of menus.

ITEM XI. - SPORTS DIET IN LONG TERM

REQUIRING A SUPPLY DURING THE COMPETITION. Cycling. Triathlon, marathon, mountain climbing, Nordic skiing, others. Ration recovery. Theoretical and practical.

ITEM XII. - SERVES FOOD IN SPORTS EQUIPMENT. SPORTS MEDIA DURATION. Football, basketball, handball and others. Theoretical and practical.

ITEM XIII DIET IN NOT ALLOWING A SPORTS SUPPLY DURING THE COMPETITION. Characterized by an effort Sports brief: pole vault, jumping length. Judo, weightlifting other sports characterized by a continued effort, middle distance. The problem of the series. Theoretical and practical.

ITEM XIV. - Nutritional ergogenic aids
ITEM XV. - Nutritional disorders in athletes. Nutrition and immune function in athletes
ITEM XVI. - Nutritional Myths common in athletes. Correct use of the nutritional needs of athletes of web pages.

PRACTICAL CONTENT
Seminars and practical

PRACTICE I - Calculation of energy needs of the individual
PRACTICE II. - Table of food composition
PRACTICE III. - Assessment of nutritional status
PRACTICE IV. - Development of diets for different sports
PRACTICE V. - Preparation of diets in different stages of physical activity.
PRACTICE VI.- Introduction to the anthropometric and nutritional assessment tool
