

Biotic Granada Campus of International Excellence

The Biotic Granada Campus of International Excellence, has been created, along with the CSIC and The Health Sciences Technological Park, as a strategic entity which supports the development of knowledge and technological developments within the fields of Biomedicine and Information and Communication Technology.

Within the framework of this initiative, the following large-scale projects are currently being undertaken: Granada Research Excellence Initiative in Biohealth (GREIB) and Granada Excellence Network in Research Laboratories (GENIL)

Please visit the [Biotic Granada Campus of International Excellence Homepage](http://www.ugr.es/en) for further information
