

## Employment and Work Placement Office

The Employment and Work Placement Office's primary objective is to facilitate our graduates' insertion into national and international labour markets. In order to achieve this aim we provide employment support services during and after your time at the UGR, ensuring you acquire the skills needed to prosper in today's globalized labour market.

At an internal level we provide services to students, graduates, researchers, and teachers. Our external stakeholders are public bodies, companies, and local and national employers.
