Parte A. DATOS PERSONALES

Nombre y Apellidos	Mikael Chala		
DNI/NIE/Pasaporte		Edad	33
Núm. identificación del investigador	Researcher ID	AAB-4586-2019	
	Scopus Author ID	54790628800	
	* Código ORCID	0000-0002-8194-1050	

* Obligatorio

A.1. Situación profesional actual

Organismo	Universidad de Granada		
Dpto. / Centro			
Dirección	Campus de Fuentenueva, 18071, Granada		
Teléfono	(+34) 958 - 241727	Correo electrónico	mikael.chala@ugr.es
Categoría profesional	Ramón y Cajal	Fecha inicio	2020
Palabras clave	Fisica hp -- altas energias -- fenomenologia		

A.2. Formación académica (título, institución, fecha)

Licenciatura/Grado/Doctorado	Universidad	Año
PhD in Theoretical Physics	Universidad de Granada	2014
MSc. in Advanced Techniques and Methods in Physics	Universidad de Granada	2011
Spanish "Licenciatura degree" in Physics	Universidad de Granada	2010

A.3. Indicadores generales de calidad de la producción científica

Parte B. RESUMEN LIBRE DEL CURRÍCULUM

I did my PhD in the University of Granada, finishing in 2014. During that period I worked on the collider phenomenology of beyond the Standard Model physics. After completing my PhD, I moved to DESY as postdoctoral fellow, where I started working on dark matter as well as on the gravitational wave signals of phase transitions. I resigned after two years to have a one-year interlude in the IFIC, after which I was awarded the Newton International Fellowship, which supports research projects at UK institutions. I was thereafter based at Durham University as research fellow of the Royal Society for two years. During this time, I also started working intensively on flavour physics.

In 2019 I joined the University of Granada as fellow Juan de la Cierva Incorporación, and in 2020 I obtained the Ramón y Cajal fellowship. My current research interests focus more on the quantum structure of effective field theories.

In total, I have coauthored **49 peer-reviewed articles**, as well as other reports. I have written the large majority of my papers without my thesis advisors (many with only other postdocs/students, including my five most cited), **two by myself**. In total, my work has received **nearly 3000 citations**, resulting in an **h-index of 27**. I have given talks at **more than 60 international conferences** and seminars all around Europe as well as United States and Asia, **more than 40 as invited speaker**. Moreover, I have co-organized four conferences. I have also made research stays at CERN, Zurich, and Prague, among others. I have also obtained **experience in applying and managing national and international funding**, being PI of several international projects, and I am member of the international collaborations LISA and ATLAS. At all stages of my career, I have also made intensive contributions to outreach.

C.5 Participación en la organización de congresos

- "BSM faces LHC run-2 realities"; Hamburg, 2016.
- "Interdisciplinary approach to QCD-like composite dark matter"; Trento, 2018.
- "Higgs effective field theory workshop 2020"; Granada, 2020.

C.6 Tareas de evaluación

- Referee for the journals PRL, JHEP, EPJC, PRD, PLB, IJMPA, MPLA and Universe.
- Referee for the funding agencies "South Africa's national research foundation" and "Laboratório de instrumentação e física experimental de partículas de Portugal".

C7 Tesis doctorales dirigidas

- Julian Alcaide; defense date: 22/07/2020.
- Maria Ramos; defense date: 06/2021.

C8 Premios

- Extraordinary prize by the University of Granada to the best PhD thesis in Science defended in 2013-2014.
- Individual performance bonus by DESY in recognition of the exceptionally good work done in 2015.
- Finalist of the XVIII edition of the international contest Science in action organized by CSIC, Lilly Foundation, ICMAT, RSEF, RSEQ, SEA, SEBBM, SGE and UNED in the category of "Physics and society", by the proposal: "A new way to look at electromagnetic waves".
- First prize in the V Outreach Contest organized by the Spanish CPAN in the category "Outreach articles", by the article: "Neutrino masses: where is our Neptune?".

Parte C. MÉRITOS MÁS RELEVANTES (ordenados por tipología)

C.1. Publicaciones

AC: Autor de correspondencia; (nº x / nº y): posición firma solicitante / total autores

- 1 Artículo científico.** Chala, Mikael; Kozow, Pawel; Ramos, Maria; Titov, Arsenii. 2020. Effective field theory for vector-like leptons Phys. Lett. B. 809, pp.135752-135752.
- 2 Artículo científico.** Castro, Nuno; Chala, Mikael; Peixoto, Ana; Ramos, Maria. 2020. Novel flavour-changing neutral currents in the top quark sector JHEP. 10, pp.038-038.
