

New electronic resources made available via the UGR Library website

23/03/2020

University news & events

New electronic resources offered by a wide range of providers and publishers have been made available via the UGR Library website. Access to the resources is unrestricted, although they will be available for a limited period only. This measure aims to enhance the resources available to our library users in these difficult times owing to the COVID-19 pandemic. A VPN connection is needed to access these resources.

Available resources

- Editorial Médica Panamericana (publishing house).
- Ingebook, which offers free access to its entire e-book collection for 30 days through the platform.
- JoVE, which will be available until the COVID-19 pandemic ends.
- JSTOR, which will provide free access until the COVID-19 pandemic ends.
- ProQuest, which features a number of databases that are now available through the UGR Library for 30 days.
